

Description

The Futuregrowth Yield Enhanced BB STEFI+ Composite targets high cash returns through active interest rate risk management, active yield curve bets, high credit concentrations in lower rated entities, high market and credit derivative usage, as well as equity risk. The Composite's weighted average rated credit quality must be a minimum of BB-. The benchmark is the South African STEFI Composite Index.

Portfolio manager	Daphne Botha
Benchmark	South African STEFI Composite Index (STeFI)
Performance target	STeFI + 5.0%

Inception date	January 2012
Total composite assets	R1.3 billion
Minimum investment	Pooled - R50 million / Segregated - R150 million (Both at manager's discretion)
Termination period	1 calendar month (size dependent)

Daphne Botha
PORTFOLIO MANAGER

Daphne is the portfolio manager for various money market and bond portfolios. In addition, she is responsible for risk monitoring and is a member of the Interest Rate team.

Objective

The Composite aims to outperform the STEFI + 5.0% per annum over a rolling three-year period.

Composition

The Composite invests in a wide range of government, parastatal, corporate debt, securitised and money market assets, subject to credit committee approval and whose relative value is expected to increase over time. 100% of this Composite can be invested in unlisted credit.

Yield enhanced strategy

Our yield enhanced strategy relies on maintaining strong relationships with market players. This allows us to see a large degree of deal-flow on a continuous basis and keep an eye on ever-evolving credit events in the market. In the unlisted space, our specialist structuring skills allow us to make loans that ensure lenders achieve the greatest degree of investor protection through loan terms, covenants and security while ensuring risk-adjusted returns with good diversification.

Derivative disclosure: Market derivatives are used frequently and extensively to manage interest rate risk of the fund relative to the benchmark, and to enable the acquisition of short-term or floating rate instruments in the fund. Market derivatives are used less frequently to opportunistically add value due to mispricings. The manager does not employ "naked" written options strategies to increase yield. Credit derivatives are allowed, but used infrequently and only within credit policies and limits. **FAIS disclaimer:** Futuregrowth Asset Management (Pty) Ltd ("Futuregrowth") is a licensed discretionary financial services provider, FSP 520, approved by the Registrar of the Financial Sector Conduct Authority to provide intermediary services and advice in terms of the Financial Advisory and Intermediary Services Act 37 of 2002. The fund values may be market linked or policy based. Market fluctuations and changes in exchange rates may have an impact on fund values, prices and income and these are therefore not guaranteed. Past performance is not necessarily a guide to future performance. Futuregrowth has comprehensive crime and professional indemnity in place. Performance figures are sourced from Futuregrowth and IRESS. **GIPS disclaimer:** Futuregrowth a subsidiary of Old Mutual Investment Group Holdings (Pty) Limited is a specialist investment company which manages the full range of interest bearing and developmental investments in an ethical and sustainable way. Futuregrowth claims compliance with the Global Investment Performance Standards (GIPS®).
