

Description

The Futuregrowth Yield Enhanced Long Duration ILB Composite targets high cash returns through active interest rate risk management (real and nominal), active yield curve bets and moderate credit concentrations. The Composite is suitable for clients wishing to have exposure to inflation linked bonds while retaining access to yield-enhanced returns. The benchmark is the JSE Composite Inflation-linked Index 12+ Year.

Portfolio manager	Jason Lightfoot
Benchmark	50% I2046 & 50% I2050
Performance target	Benchmark + 1%
Current weighted average credit quality (Internal rating)	AAA-

Current structure	Pooled
Inception date	June 2011
Total composite assets	R4.1 billion
Minimum investment	Pooled - R25 million / Segregated - R100 million (Both at manager's discretion)
Termination period	1 calendar month (size dependent)

Jason Lightfoot
 PORTFOLIO MANAGER

Jason is the Portfolio Manager of our flagship products, the Futuregrowth Infrastructure & Development Bond Fund and the Futuregrowth Power Debt Fund, as well as various other credit funds across STeFI, Income and ILB benchmarks. He holds a pivotal position within the team, contributing to diverse investment processes and decisions with an expertise in credit and risk assessment.

Objective

The Composite seeks to outperform the benchmark by 1% per annum over a rolling 3-year period.

Composition

The Composite invests in a wide range of government, parastatal, corporate debt and securitised assets, subject to credit committee approval, and whose relative value is expected to increase over time. The Composite is converted from nominal to real through an inflation-linked bond overlay. The Composite has an allowance to invest up to 50% in unlisted credit.

Yield enhanced strategy

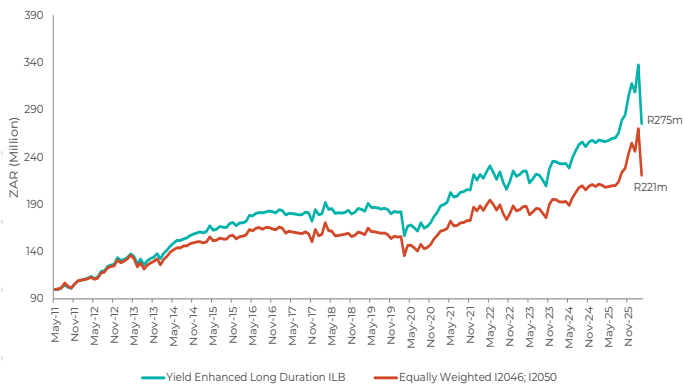

Our yield enhanced strategy relies on maintaining strong relationships with market players. This allows us to see a large degree of deal-flow on a continuous basis and keep an eye on ever-evolving credit events in the market. In the unlisted space, our specialist structuring skills allow us to make loans that ensure lenders achieve the greatest degree of investor protection through loan terms, covenants and security while ensuring risk-adjusted returns with good diversification.

Performance

*Annualised

Cumulative performance

Derivative disclosure: Market derivatives are used frequently and extensively to manage interest rate risk of the fund relative to the benchmark, and to enable the acquisition of short-term or floating rate instruments in the fund. Market derivatives are used less frequently to opportunistically add value due to mispricings. The manager does not employ "naked" written options strategies to increase yield. Credit derivatives are allowed, but used infrequently and only within credit policies and limits. **FAIS disclaimer:** Futuregrowth Asset Management (Pty) Ltd ("Futuregrowth") is a licensed discretionary financial services provider, FSP 520, approved by the Registrar of the Financial Sector Conduct Authority to provide intermediary services and advice in terms of the Financial Advisory and Intermediary Services Act 37 of 2002. The fund values may be market linked or policy based. Market fluctuations and changes in exchange rates may have an impact on fund values, prices and income and these are therefore not guaranteed. Past performance is not necessarily a guide to future performance. Futuregrowth has comprehensive crime and professional indemnity in place. Performance figures are sourced from Futuregrowth and IRESS. **GIPS disclaimer:** Futuregrowth a subsidiary of Old Mutual Investment Group Holdings (Pty) Limited is a specialist investment company which manages the full range of interest bearing and developmental investments in an ethical and sustainable way. Futuregrowth claims compliance with the Global Investment Performance Standards (GIPS®).
