Yield enhanced strategy

Our yield enhanced strategy relies on maintaining strong relationships with market players. This allows us to see a large degree of deal-flow on a continuous basis and keep an eye on ever-evolving credit events in the market. In the unlisted space, our specialist structuring skills allow us to make loans that ensure lenders achieve the greatest degree of investor protection through loan terms, covenants and security while ensuring risk-adjusted returns with good diversification.

Derivative disclosure: Market derivatives are used frequently and extensively to manage interest rate risk of the fund relative to the benchmark, and to enable the acquisition of short-term or floating rate instruments in the fund. Market derivatives are used less frequently to opportunistically add value due to mispricings. The manager does not employ "naked" written options strategies to increase yield. Credit derivatives are allowed, but used infrequently and only within credit policies and limits. **FAIS disclaimer:** Futuregrowth Asset Management (Pty) Ltd ("Futuregrowth") is a licensed discretionary financial services provider, FSP 520, approved by the Registrar of the Financial Sector Conduct Authority to provide intermediary services and advice in terms of the Financial Advisory and Intermediary Services Act 37 of 2002.
